

TOURING II

Test the Limits while on the road with these durable and flexible goggles, which allow continuous clarity and comfort. Made of polymer elastomer material, the frame is shock-resistant, non-allergenic and lightweight. Airflow is regulated through vented slots on the frame front which prevent fogging. The anti-fog polycarbonate lenses are shatter-resistant and provide 100% protection against UVA/UVB ultraviolet rays. Open cell foam absorbs sweat and retains vision clarity by excluding dust and debris.
